

Grace 
HEALTH and REHAB
of GREENE COUNTY

SERVING YOU FROM OUR HEART

welcome to our facility

Grace Health and Rehab of Greene County is a 90-bed skilled nursing and rehabilitation facility also offering a secure memory care unit in the rural picturesque community of Stanardsville, Virginia amongst the foothills of the Blue Ridge Mountains. Providing physical, occupational, speech, respiratory, and outpatient therapy services, our team is dedicated to being the regional facility of choice for comprehensive care. We endeavor to create a supportive, home-like environment offering private suites, fine dining, respite stays, and comfort care services. Our facility's success is based on a positive reputation, community involvement and proactive clinical treatment. With Renaissance Assisted Living and The Harbor at Renaissance on our shared Village Campus, we are able to serve residents' needs with a continuum of care. We invite you to tour today!

We accept Medicare, Medicaid, most insurances, and private pay.

skilled nursing

Grace Health and Rehab of Greene County's skilled nursing services are oriented around provision of specialized care for recovery after hospitalization. Our dedicated team helps residents and family members feel at home while receiving individually-focused healthcare. From nursing care and nutritional support for recovery, to the activities of daily living, we focus on an innovative, comprehensive interdisciplinary approach. Our services include diabetes management, ostomy care, tracheostomy care, respiratory therapy, IV management, post-surgical care, and wound care.

rehabilitation

Whether recovering from a stroke, fall, or any other health condition that would benefit from rehabilitation, our therapy department provides a variety of services for our community. Working to gain a clear understanding of personal goals, we are committed to returning our residents to the highest possible level of function and independence. Utilizing state-of-the-art programming, our team has the education and experience to help residents meet goals through physical, occupational and speech services, as well as outpatient therapy services.

secure memory care unit

It is our goal to provide compassionate care to those diagnosed with Alzheimer's and other related cognitive disorders. Complementary therapies and non-pharmacological interventions are encouraged in our Secure Memory Care Unit, where staff endeavor to provide a home-like setting with extended comfort and individualized activities, including the use of our Multi-Sensory Room.

respite

Our team manages a respite program that provides caregivers time-off from caring for a loved one at home. In the event that care is needed for a long weekend or for a few weeks, family members can feel secure knowing their loved one is provided with a safe, home-like healthcare setting where both short- and long-term residents receive clinical monitoring by an educated, skilled staff whose goal is to meet needs quickly.

health & wellness

We embrace the concept of socialization for every resident and believe the healing process and long-term health stability relies on Whole Person Care. From fine dining experiences, pet therapy and beauty shop visits, to gardening, live music events and Resident Council meetings, our staff supplements wellness by delivering opportunities for residents to maintain a fulfilled and pleasurable stay. From one-on-one interaction to group participation, our energetic team strives to utilize tailored activities to meet the individualized needs of our residents. Our compassion is expressed both by how care is delivered by our staff, and how we organize and operate our building and programs.

comfort care

Our comfort care program, which includes both palliative and hospice care, provides for individual resident wishes. Our goal is to comfort the resident and help them transition through this phase in their life. Our facility's nursing team also offers support to the families and loved ones of a resident going through a Graceful End of Life Transition. It is our staff's intention to be mindful of when visitors are present and to anticipate their needs.

about our support partners

Grace Healthcare Support Services is a privately owned organization that supports skilled nursing, assisted living and rehabilitation facilities across the United States. It is our goal that you or your loved one will receive quality, compassionate care by well-trained professionals whose goal is *servicing you from the heart.* Our facility care partners provide each resident the opportunity to achieve their greatest potential and also endeavor to provide peace of mind to families. Our company's philosophy of Graceful Living encourages facility teams to go above and beyond in creating warm, caring environments. This common goal drives us to develop new programs and initiatives that support continuous improvement in care.
